TEACHER TOOL

Lesson Engine

● IN TESTING

AI-powered lesson planning: a complete lesson from one prompt.

PREVIEW WITH SAMPLE DATA · NAMES ARE MADE UP

What it does

Lesson Engine turns one AI prompt into a complete lesson. The teacher copies a single prompt into Gemini, pastes the answer back, and the app builds the lesson plan, info sheet, worksheet and slides together, with Support, Stretch, Easier to read and Arabic versions.

How it works

STEP 1

Copy one prompt

Lesson Engine writes the prompt for your subject, class and topic. Copy it into Gemini.

STEP 2

Paste the AI's answer

Paste the reply back in. One paste is all it needs.

STEP 3

Your lesson is ready

The plan, info sheet, worksheet and slides are made together, ready to check.

STEP 4

Add versions and share

Switch on Support, Stretch, Easier to read or Arabic, then post to Google Classroom, teach it live or print it.

Key features

Plan, info sheet, worksheet and slides
Everything for one lesson, made together and matched to each other.

Versions for different needs
Support, Stretch, Easier to read and Arabic versions, alongside the core lesson.

Three ways to deliver
An interactive online lesson, drafts in Google Classroom, or print.

Teach mode
Present the lesson straight from the app.

Live progress board
See how the class is moving through the lesson.

Seating plans
Plan where learners sit, built in.

Good to know

- ✓ One prompt and one paste, then check the lesson before you teach it.
- ✓ English and Arabic versions of a lesson.
- ✓ Works with Google Workspace and Google Classroom.
- ✓ Made by a teacher, for teachers.
